# Table of contents

# 1 Overview

MTSW is a professional multimedia alarm processing and management software exclusively developed by Bosch.

MTSW connects with Multi-Tenant System (MTS), D6600/D6100 receivers, DS7400 series control panels, B/G series control panels and Video Door Phone (VDP) system.

# 2 Installation notes

– Order MTSW latest client version, and install MTSW through the installation CD.
– Go to website ( https://www.boschsecurity.com ), select a country/region, and search MTSW, then download installation package from your desired client version to install.

# 3 Version 2.0.6

## 3.1 What's new

This version supports B/G Series control panel of firmware version 3.11 and higher.

## 3.2 Corrections

This version corrects the following issues:
– the user name or password can be re-configured less than 6 alphanumeric characters
– user can only change the password once
– Actions cannot be performed when no event is listed in the **Pending Event** tab

# 4 Version 2.0

**System requirements:**
CPU - Intel PIII 2.4 GHz or higher
Hard disk - 30 G or more
Memory - 8 G RAM, higher is preferable
Operation system - Microsoft Windows 7/8/10 (32/64 bit)
Microsoft .NET Framework 4.5.2 (only for Windows 7) - Download Microsoft .NET Framework 4.5.2 from Microsoft website and install it manually if Microsoft .NET Framework higher version has been installed in the computer.

## 4.1 What's new

This version supports B/G Series control panel of firmware version 3.10 and higher.

## 4.2 Upgrade considerations

If an earlier version of MTSW was previously installed, you must obey the following steps:
1. Back up MTSW data with the MTSW System Maintenance Tool.
2. Perform an upgrade installation to MTSW V2.0.
   – For MTSW versions earlier than V1.30.01, the software dongle (Sentinel System Key) need to be replaced.
3. Restore MTSW data with the MTSW System Maintenance Tool.

# 5 Open Source License Statements

This software contains the FIPS-197 compliant AES implementation from PolarSSL licensed as follows:

Note: This license file was taken from PolarSSL-0.10.1 and modified by Texas Instruments with permission by Paul Bakker of PolarSSL (http://www.polarssl.com). The only change is to allow redistributions in embedded binaries to only have a "published" copyright and license notice via a website. This is because embedded applications do not generally have copyright displays and often do not have published documentation (as they are part of a larger system).

Based on XySSL: Copyright (c) 2006-2008, Christophe Devine.
